

**BOLSTER UP CHEMICAL SOLUTION COMPANY**

M.S.D.S / T.D.S.

## **NF MICRO-PEL (004)**

**(Cylinder Lubricant)**

- > Extends diamond shoe Life, Saving time and money.
- > The unique dry coating prevents debris from collecting on the engraving stylus, shoe and burr cutter.
- > A non-flammable formula for safer use and storage,
- > A soil retarding and water repellent finish.
- > Prevents score marks by allowing the shoe to glide smoothly across the cylinder.
- > Easy to apply and maintain an even coating.
- > Cylinder Application of NF Micro-PEt
  1. Clean the cylinder surface.
  2. Apply a very thin, even layer of NF Micro-PEL lubricant to the rotating cylinder using a paper towel or cloth. Avoid heavy streaks during the application.
  3. Wipe off any excess lubricant with a clean, dry paper towel or cloth.
  4. Wipe the cylinder several additional times to ensure any excess lubricant has been removed. This also buffs the cylinder to a smooth finish, ready of engraving.

### **Care of NF Micro-PEL**

Keep from freezing. Product store in cold or freezing temperatures may separate or thicken. This will not Harm the performance of NF Micro-PEL. Before using, warm to room temperature and mix thoroughly.

NF Means Non-Flammable. Please note the NF Micro-PEL is sold in two different formulas.

NF Micro-PEL is the SAFE, NON FLAMMABLE FORMULA for use as a Gravure Cylinder lubricant.
